1. Go to https://reactive.fugi.tech/ and log in using your discord account

IMPORTANT: Make sure that you and/or your friends are in a **VOICE CHANNEL** in a discord channel otherwise this won't work. The streamer must also use **OBS** as it is the only supported broadcasting app by Discord Reactive.

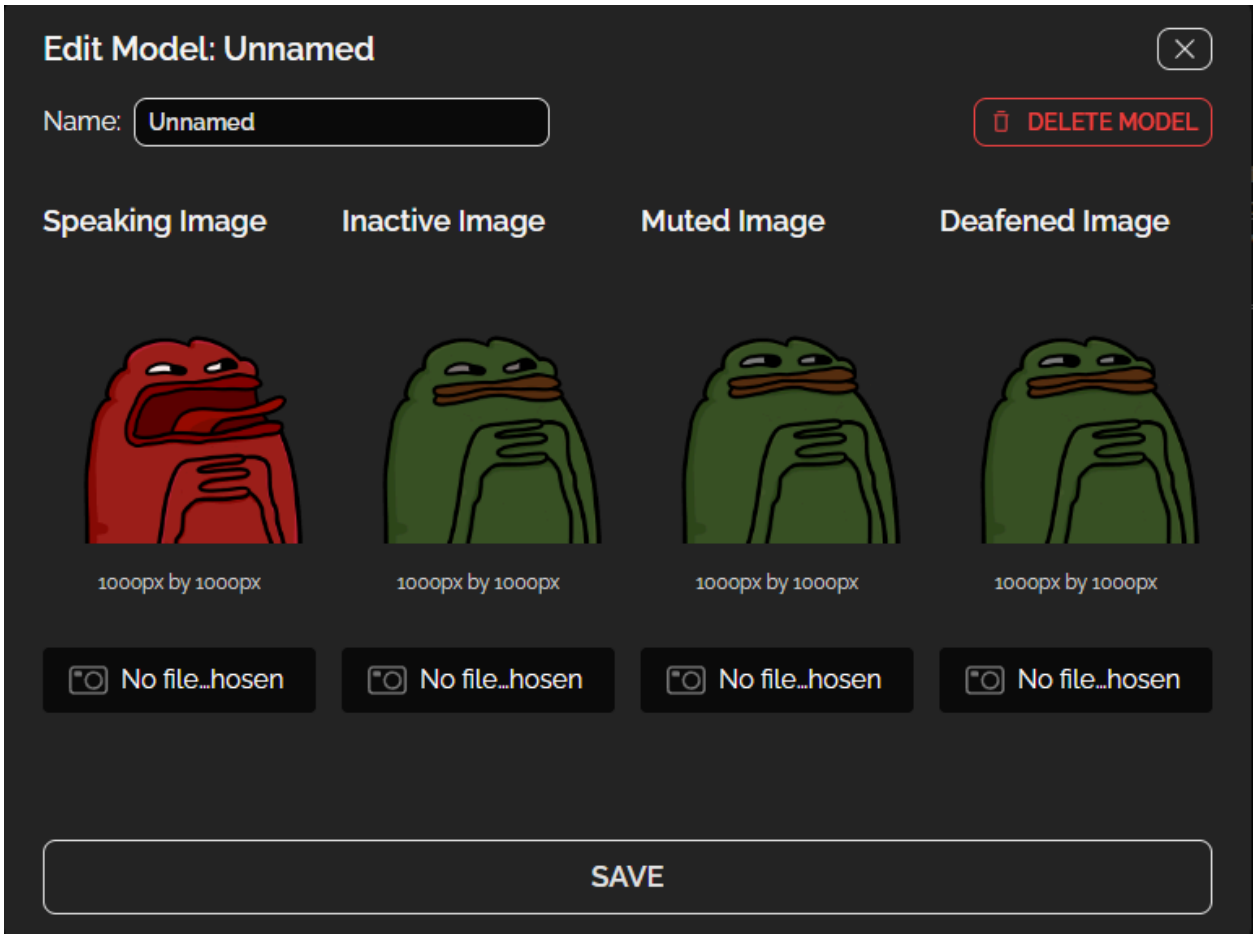

2. Use these config settings if you want to have the same effect like the preview of these pngtubers

3. To add a pngtuber of your own, click the + button under the models section

4. Import the pngtuber that you want for yourself and click save

5. To add a pngtuber for your friends, click on the cogwheel next to their name and import the png you want for them.

NOTE: Make sure that you and your friends are in a voice channel otherwise this option will not appear

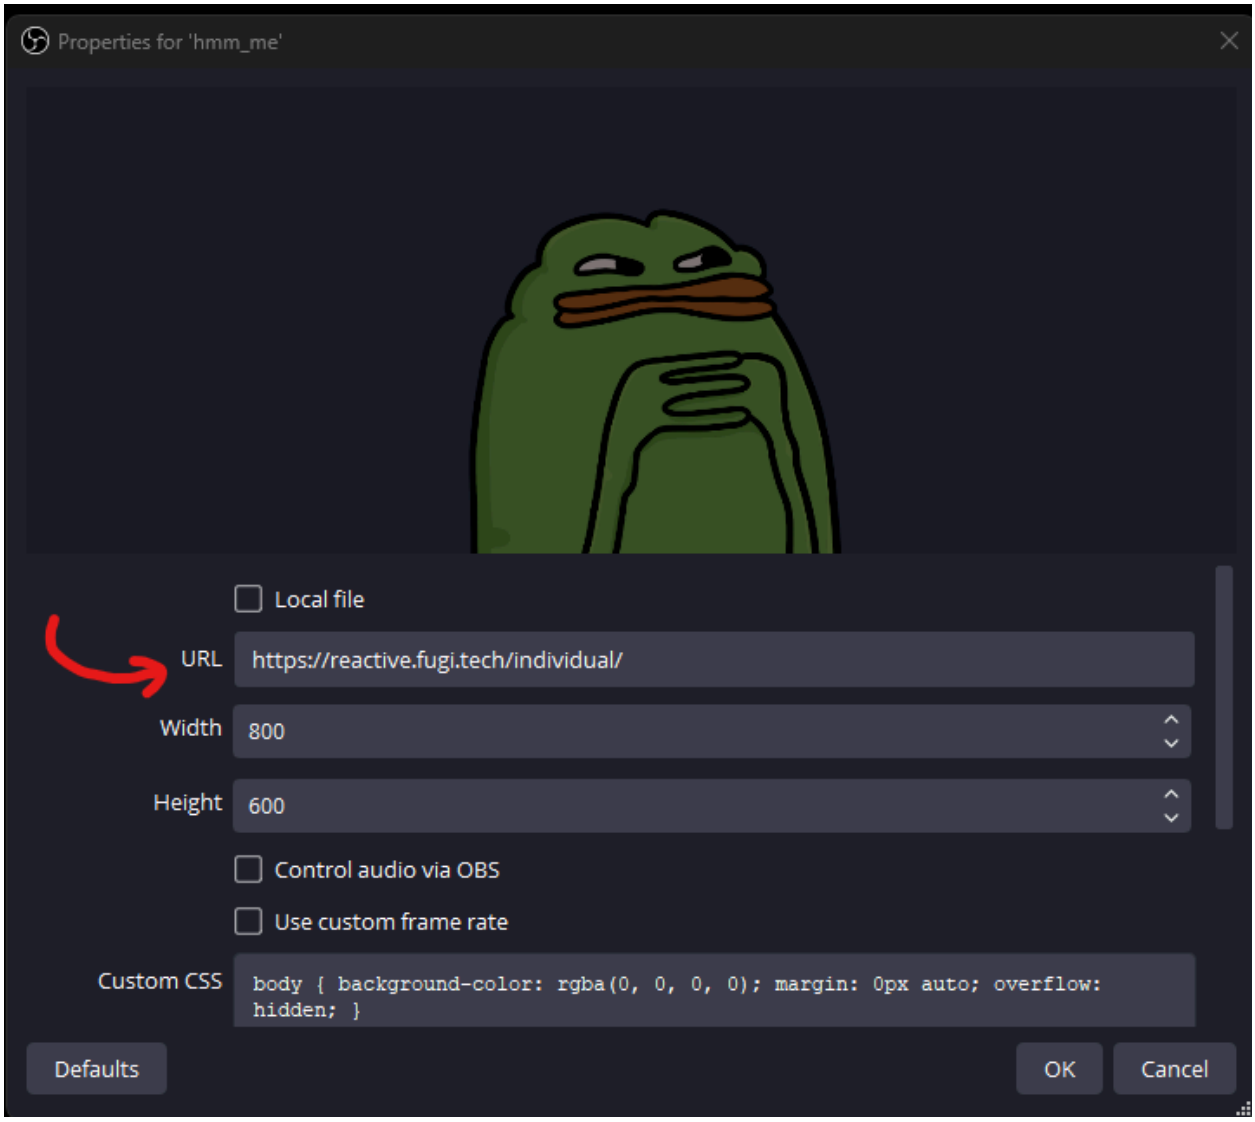

How to add the pngs in OBS:

1. Click the clipboard icon

2. Open OBS and click the + Add Source Button
3. Choose Browser Source
4. Paste the new url in the url section and click OK

5. Resize and transform to your liking
6. Start from step 1 and add a new browser source for every person that you want to have a png in your stream, if you have friends in the call.

HAPPY STREAMING <3
